

Claims

What is claimed is:

- 5 1. A two sided glove comprising:
a palm piece containing an inner thumb piece and
adapted to form a first finger pocket and a fourth
finger pocket;
an outer thumb piece stitched to said inner thumb
10 piece;
two side thumb pieces stitched to said inner thumb
piece and said outer thumb piece; and
a middle fingers piece stitched to said palm piece
and adapted to form a second finger pocket and a third
15 finger pocket;
wherein said glove has an outer and an inner
surface and said stitching is concealed from said
glove's outer surface by virtue of said stitching being
performed on said inside surfaces.
20
2. The two sided work glove of Claim 1 further
comprising a cuff piece stitched to said palm piece.
3. The two sided work glove of Claim 1 further
25 comprising:
a short narrow strip of material sandwiched
between said middle fingers piece and said palm piece
by the stitching joining said middle fingers piece and
said palm piece; and
30 a long narrow strip of material sandwiched between
said thumb side piece and said palm piece by the
stitching joining said thumb side piece and said palm
piece;
wherein said short narrow strip and said long
35 narrow strip are adapted to form overhanging thread

savers on an exterior surface of the glove.

4. The glove of claim 1 further comprising an
internal liner stitched to an interior surface of said
5 glove.

5. The glove of claim 1 further comprising a wear
guard piece of material sewn onto said palm piece
wherein said wear guard is patterned to conform to
10 areas of said glove subject to excessive wear.

6. The glove of claim 3 further comprising an
internal liner stitched to an interior surface of said
glove

15

7. The glove of claim 6 further comprising a wear
guard piece of material sewn onto said palm piece
wherein said wear guard is patterned to conform to
areas of said glove subject to excessive wear.

20

8. The glove of claim 2 further comprising an
internal liner stitched to an interior surface.

9. The glove of claim 7 further comprising a wear
25 guard piece of material sewn onto said palm piece
wherein said wear guard is patterned to conform to
areas of said glove subject to excessive wear

10. A two sided glove comprising:
30 stitching thread;

a palm piece containing an inner thumb piece and
adapted to form a first finger pocket, a fourth finger
pocket and a palm pocket;

an outer thumb piece stitched to said palm piece
35 and adapted to form a thumb pocket; and

a middle fingers piece stitched to said palm piece and adapted to form a second finger pocket and a third finger pocket;

5 wherein said glove has an outer and an inner surface and said stitching thread is concealed from said glove's outer surface by virtue of said stitching being performed on said inside surfaces.

11. The glove of claim 10 further comprising a cuff
10 piece stitched to said palm piece.

12. The glove of claim 10 further comprising:
a short narrow strip of material sandwiched
between said middle fingers piece and said palm piece
15 by the stitching joining said middle fingers piece and said palm piece; and

a long narrow strip of material sandwiched between
said outer thumb piece and said palm piece by the
stitching joining said outer thumb piece and said palm
20 piece;

wherein said short narrow strip and said long narrow strip are adapted to form overhanging thread savers on an exterior surface of the glove.

25 13. The glove of claim 10 further comprising a wear guard piece of material sewn onto said palm piece wherein said wear guard is patterned to conform to areas of said glove subject to excessive wear.

30 14. The glove of claim 10 further comprising an internal liner stitched to an interior surface of said glove.

15. The glove of claim 11 further comprising;
35 a short narrow strip of material sandwiched

between said middle fingers piece and said palm piece
by the stitching joining said middle fingers piece and
said palm piece; and

5 a long narrow strip of material sandwiched between
said outer thumb piece and said palm piece by the
stitching joining said outer thumb piece and said palm
piece;

wherein said short narrow strip and said long
narrow strip are adapted to form overhanging thread
10 savers on an exterior surface of the glove.

16. The glove of claim 15 further comprising an
internal liner stitched to an interior surface of said
glove.
15

17. The glove of claim 16 further comprising a wear
guard piece of material sewn onto said palm piece
wherein said wear guard is patterned to conform to
areas of said glove subject to excessive wear.
20

18. The glove of claim 12 further comprising an
internal liner stitched to an interior surface.

19. The glove of claim 18 further comprising a wear
25 guard piece of material sewn onto said palm piece
wherein said wear guard is patterned to conform to
areas of said glove subject to excessive wear.

20. A two sided glove comprising:

30 a stitching thread;

a palm piece symmetrical about a central axis,
containing an inner thumb section and seven finger
extensions adapted to form a first finger pocket, a
second finger pocket, a third finger pocket, a fourth
35 finger pocket and a thumb pocket when said palm piece

is folded approximately in half about said central axis;

three finger sides stitched to said palm piece to form said second finger pocket, said third finger

5 pocket and said fourth finger pocket; and

an outer thumb piece stitched to said inner thumb section and said palm piece to form said thumb pocket;

wherein said glove has an outer and an inner surface and said stitching is concealed from said
10 glove's outer surface by virtue of said stitching being performed on said inside surfaces.

21. The two sided glove of claim 20 wherein said outer thumb piece further comprises a thumb back piece
15 and two substantially identical thumb side pieces which are mechanically attached to said thumb back piece.

22. A two sided single finger work mitt comprising; stitching thread;

20 a palm piece symmetrical about a central axis, containing an inner thumb flap, an index finger section, and a group finger section that is adapted to form an index finger pocket, a palm pocket and a group finger pocket when folded into approximate half about
25 said central axis;

an outer thumb piece stitched to said inner thumb flap and adapted to form a thumb pocket; and

an inner finger piece stitched to said index finger section.

30

23. The two sided single fingered work mitt of claim 22 wherein said outer thumb piece further comprises a thumb back piece and two substantially identical thumb side pieces which are mechanically attached to said
35 thumb back piece.

24. The single finger work glove of claim 22 further comprising an elastic strap sewn to distal sides of said front piece and residing above said back piece, wherein said elastic is adapted to bring said distal
5 sides into closer proximity by buckling said back piece.

25. The single finger work glove of claim 21 further comprising a hem trim strip sewn around an opening in
10 said glove.
